- Stat Reporting & BEEP Online
- Stat Reporting & USR-Online
- Financial Reporting & FDRA
- Test Audit/Classification

•**Select your topics!**

•**Select your dates!**

•**We will create a program that is personalized to you!**

•**Our Location or Yours**

We are happy to customize the **WC** data reporting training you need! Most insurance companies have unique ways of fulfilling their reporting requirements. **PCRB** staff will gladly talk with you and get to know your organization so that we may understand your current reporting methods and work with you to develop quicker, more efficient ways to report data.

Based on your goals, **PCRB** staff will develop a high-impact targeted training experience designed to achieve the results you expect. We will help you discover resources currently available to assist you with policy, statistical and actuarial data transactions, as well as introduce you to various workers compensation products available through the American Cooperative Council on Compensation Technology (**ACCCT**). Your staff will receive hands-on experience using these new data reporting tools to help increase data quality. But most of all, your staff will expand their knowledge of data reporting practices. In addition, any classification and/or test audit concerns your company may have can be addressed via interaction with key members of the **PCRB** staff in these respective areas.

If you are interested in having a customized seminar created for your company, contact **Bruce Decker** now via e-mail at bdecker@pcrb.com or **215-568-2371, Ext. 4411** to arrange your personal data reporting **workout !**
